Exercise 3-12

1. Continue from Exercise 3-11 or start AutoCAD.

2. Start a new drawing from scratch or use a template of your choice. Save the drawing as EX3-12.

3. Use the **LINE** command to draw two connected lines and then exit the **LINE** command.

4. Use the **LINE** command to draw three connected lines and then exit the **LINE** command.

5. Use the **LINE** command to draw four connected lines and then exit the **LINE** command.

6. Erase two of the last four lines you drew.

7. Use the **UNDO** command to undo the last three operations. The first two lines drawn should be the only objects still visible.

8. Use the **Redo** flyout list on the **Quick Access** toolbar to bring back all of the lines.

9. Use the **LINE** command to draw several lines of your own design.

10. Access the **ERASE** command and erase all of the lines.

11. Use the **U** command to undo the erase.

12. Draw several connected line segments using the **LINE** command.

13. Use the **U** command to remove the previously drawn lines.

14. Resave and close the file.

15. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
