

Exercise 5-1

1. Start AutoCAD if it is not already started.
2. Start a new drawing from scratch or use a template of your choice. Save the drawing as EX5-1.
3. Display the **Layer Properties Manager**.
4. Create a list of layer names similar to those in Figure 5-7, but in a different order. Notice that AutoCAD automatically lists the names in alphanumeric order.
5. Close the **Layer Properties Manager**.
6. Resave and close the file.
7. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
