

Exercise 6-3

1. Continue from Exercise 6-2 or start AutoCAD.
2. Open a previous drawing that contains objects.
3. Do not use the **ZOOM** navigation command during this step. Use realtime zooming to zoom in and zoom out.
4. Access steering wheels.
5. Pick the **REWIND** wedge once and notice the display. You should see the brackets move over the previous frame identified by the rewind icon.
6. Use the **ZOOM** navigation command to zoom in and out.
7. Use the **CENTER** navigation command to pan to a point on an object of your choice.
8. Use realtime panning to adjust the display.
9. Experiment with using the **REWIND** navigation command by pressing and holding the **REWIND** wedge and rewinding through previous displays. Restore a display of your choice.
10. Close the drawing without saving changes.
11. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
