

Exercise 11-1

1. Start AutoCAD if it is not already started.
2. Start a new drawing from scratch or use a template of your choice. Save the drawing as EX11-1.
3. Draw objects similar to the “Process” objects shown in Figure 11-1. Use the **FILLET** command as needed to create objects similar to the “Result” objects shown in Figure 11-1.
4. Resave and close the file.
5. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
