# Exercise 11-9

1. Continue from Exercise 11-8 or start AutoCAD.

2. Start a new drawing from scratch or use a template of your choice. Save the drawing as EX11-9.

3. Draw two 2.25″ squares so that two sides of each square are horizontal.

4. Use the **SCALE** command to double the size of one square.

5. Use the **Reference** option to make each side of the other square 3.25″ long.

6. Resave and close the file.

7. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
