# Exercise 15-6

1. Continue from Exercise 15-5 or start AutoCAD.

2. Start a new drawing from scratch or use a template of your choice.

3. Access the **QuickCalc** palette and evaluate the following expressions. Pay attention to how the result of a calculation appears in the input box. Use the value to form additional expressions.

   A. 5+3

   B. 8–5

   C. (3*2)*5

   D. 3*2*5

   E. 30/2+5

4. Evaluate the following expressions. Clear the input box after entering each expression.

   A. 6+2*4

   B. (6+2)*4

5. Clear the history area.

6. Close the drawing without saving.

7. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
