

## Exercise 18-5

1. Continue from Exercise 18-4 or start AutoCAD.
2. Start a new drawing from scratch or use a template of your choice. Save the drawing as EX18-5.
3. Open the **Multileader Style Manager** dialog box and pick the **Modify...** button.
4. Explore each tab in the **Multileader Style Manager** dialog box.
5. Adjust multileader characteristics and watch how the preview image changes with each selection.
6. Create new multileader styles as needed to match the type of drafting you perform and change the settings in each tab.
7. Resave and close the file.
8. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
