

Exercise 29-7

1. Continue from Exercise 29-6 or start AutoCAD.
2. Open the EX29-6 file you saved during Exercise 29-6.
3. Save a copy of EX29-6 as EX29-7. The EX29-7 file should be active.
4. Make **My Layout** current.
5. Activate floating viewports as needed and use the **Layer Properties Manager** to create the following layer property overrides:
 - A. Override the color applied to the circle to green.
 - B. Override the linetype applied to the ellipse to Continuous.
 - C. Override the color applied to the hexagon to 114, and override the lineweight to 1.00 mm. Pick the **Show/Hide Lineweight** button on the status bar, if it is not selected, to display lineweights.
6. Reactivate paper space.
7. Pick the **Model** tab to enter model space. Notice how all objects appear using the global layer properties.
8. Re-enter paper space.
9. Resave and close the file.
10. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
