

## Exercise 13-3

1. Continue from Exercise 13-2 or start AutoCAD.
2. Start a new drawing from scratch or use a template of your choice. Save the drawing as EX13-3.
3. Use the **RECTANGLE** command to draw a rectangle similar to the one shown on the left in Figure 13-7. Orient the long sides so they are at 0°.
4. Use grips to rotate the object 45°.
5. Use the **Reference** option to rotate the object to a new angle of 10°.
6. Resave and close the file.
7. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
