

## Exercise 14-2

1. Continue from Exercise 14-1 or start AutoCAD.
2. Start a new drawing from scratch or use a template of your choice. Save the drawing as EX14-2.
3. Draw a polyline with a series of segments, at least three of which should be arcs. The polyline should have at least eight vertices.
4. Issue the **PEDIT** command and enter the **Edit vertex** option. Move the “X” marker to different vertices using the **Next** and **Previous** options.
5. Change the starting and ending widths of one segment.
6. Resave and close the file.
7. Continue to practice using the **PEDIT** command by completing the activities in act14-02a.dwg and act14-02b.dwg available on the companion website.
8. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
