

## Exercise 2-6

1. Continue from Exercise 2-5 or start AutoCAD.
2. Start a new drawing from scratch using the imperial format. Save the drawing as EX2-6.
3. Access the **Drawing Units** dialog box. Make the linear units **Architectural** and the angular measurements **Decimal Degrees**.
4. Set the number of decimal places for angles to 3 and specify counterclockwise measurement for angles.
5. Pick the **OK** button to exit the **Drawing Units** dialog box.
6. Resave and close the file.
7. Keep AutoCAD open for the chapter review and problems, or exit AutoCAD if necessary.
