AutoCAD and Its Applications BASICS

Exercise 3-13

- 1. Continue from Exercise 3-12 or start AutoCAD.
- 2. Start a new drawing from scratch or use a template of your choice. Save the drawing as EX3-13.
- 3. Draw a rectangle using the **LINE** command and relative polar coordinates.
- 4. Access the **ERASE** command and erase the rectangle using the pick box.
- 5. Draw a rectangle using the **LINE** command and absolute coordinates.
- Access the ERASE command and use the pick box to erase three of the four sides.
- Draw a square using the LINE command with relative coordinates and the Close option.
- 8. Access the **ERASE** command and use an automatic window selection to erase the entire square.
- 9. Draw a rectangle using the **LINE** command, ortho mode, and direct distance entry.
- Access the ERASE command and erase three of the four lines using automatic crossing selection.
- 11. Resave and close the file.
- 12. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
