

## Exercise 13-14

1. Continue from Exercise 13-13 or start AutoCAD.
2. Open the EX13-13 file you saved during Exercise 13-13.
3. Save a copy of EX13-13 as EX13-14. The EX13-14 file should be active.
4. Open the EX13-10 file you saved during Exercise 13-10.
5. Tile the two open drawings horizontally.
6. Select all of the objects in EX13-10.
7. Right-click and select **Copy with Base Point**. Select the center of the circle as the base point.
8. Click in the EX13-14 window to make it active.
9. Right-click and select **Paste**. Pick a new location for the objects.
10. Select the line and circle in EX13-10 and copy them to the Windows Clipboard.
11. Use the **Paste as Block** option to paste the objects into EX13-14.
12. Pick the newly pasted line or circle and notice that they are selected together as if they were a single object.
13. Use the **MATCHPROP** command to paint the properties of the word LINE from EX13-10 to your name in EX13-14.
14. Resave and close the files.
15. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
