Exercise 18-5

1. Continue from Exercise 18-4 or start AutoCAD.

2. Start a new drawing from scratch or use a template of your choice. Save the drawing as EX18-5.

3. Set up the appropriate layers, including a layer for annotations.

4. Draw objects similar to those in Figure 18-23. Create the multileader styles needed to add the leaders shown. Use the **MLEADER** command to add the leaders.

5. Use the **MLEADER** command to do the following. Create multileader styles as needed.

   • Draw a leader using each of the three placement options.

   • Create a multileader style that uses the **Block** multileader type. Create leaders using the new style.

   • Create a multileader style that uses the **None** multileader type. Create leaders using the new style.

   • Experiment by adjusting multileader style settings and observe the changes made to existing leaders.

6. Resave and close the file.

7. To continue practicing using the **MLEADER** command, complete the activity in act18-05.dwg available on the companion website.

8. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
