

## Exercise 23-7

1. Continue from Exercise 23-6 or start AutoCAD.
2. Start a new drawing from scratch or use a decimal template of your choice.  
Save the drawing as EX23-7.
3. Set up the appropriate layers, including a layer for hatch patterns.
4. Draw an object similar to the object shown in Figure 23-25.
5. Use **DesignCenter** to display the hatch patterns available in the acad.pat file.
6. Use the drag-and-drop method to apply the ANSI31 hatch pattern to the four sections that require hatching.
7. Resave and close the file.
8. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
