# Exercise 23-8

1. Continue from Exercise 23-7 or start AutoCAD.

2. Start a new drawing from scratch or use a decimal template of your choice.
   Save the drawing as EX23-8.

3. Set up the appropriate layers, including a layer for hatch patterns.

4. Use the **CIRCLE** and **SPLINE** commands to create closed original objects similar
   to those shown.

5. Access the **Tool Palettes** palette and display the **Hatches and Fills** tool palette.

6. Drag and drop one of the Solid imperial hatches to one of the objects.

7. Drag and drop the Steel imperial hatch pattern to the unhatched object.

8. Resave and close the file.

9. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
