

# AutoCAD Certified User Exam

The AutoCAD Certified User Exam is designed for students seeking first-level certification in AutoCAD. The AutoCAD Certified User Exam is intended for testing proficiency and skills acquired in a first-level course. By earning AutoCAD Certified User certification, students can demonstrate core skills when seeking employment or applying to a college.

The AutoCAD Certified User Exam tests knowledge of AutoCAD commands and functions and the ability to demonstrate fundamental skills. The exam consists of assessment and performance-based questions. Exam questions are based on objectives pertaining to AutoCAD commands and functions. Upon passing the exam, students receive the AutoCAD Certified User certification.

A listing of the exam objectives for the AutoCAD Certified User Exam is available on the companion website ([www.g-wlearning.com/CAD/](http://www.g-wlearning.com/CAD/)). Included are correlations to chapters in *AutoCAD and Its Applications—Basics* where related topics are covered.
