

Chapter 16

Name _____ Date _____ Period _____

Lesson 16.4 Graphic Organizer

The Effects of Aging

As you learned earlier in Chapter 16, growth and development begins before a baby is even born. Once a baby is born, growth and development occur rapidly throughout childhood and into adolescence when puberty begins. In Lesson 16.4, you will learn that development continues into adulthood. As you are reading this lesson, use the organizer below to note the development and changes that occur during adulthood.
