## AutoCAD and Its Applications ADVANCED

## Exercise 2-5

1. Begin a new drawing based on the acad3D.dwt template. Select the 3D Modeling workspace.
2. Construct a helix with the following measurements:

- Base and top diameter of .75".
- Clockwise twist.
- Turn height of $.15^{\prime \prime}$.
- Helix height of $1.5^{\prime \prime}$.

3. How many turns does the helix have?
4. Construct a second helix with the same measurements, except make it tapered to a . $35^{\prime \prime}$ diameter top.
5. Construct two more helix primitives using the same measurements given above, but rotate the axis into the $X Y$ plane using polar tracking.
6. Save the drawing as EX2-5.
