

Exercise 3-3

1. Open the drawing Pergola_bridge.dwg provided on the companion website.
2. Display the view cube if it is not already displayed. Also, turn on the UCS icon if it is not already on.
3. Set the Conceptual visual style current.
4. Open the **View Cube Settings** dialog box. All work in this exercise will use this dialog box.
5. Change the location of the view cube. Exit the dialog box to see the new position.
6. Change the size and opacity of the view cube. Exit the dialog box each time to see the results.
7. Change the opacity of the view cube to zero. Exit the dialog box and locate the view cube.
8. One at a time, turn off the options in the **When clicking on the View Cube** area of the **View Cube Settings** dialog box. Test each one to see how it affects the appearance and function of the view cube and the model display.
9. Close the drawing without saving.
