

Exercise 3-7

1. Open the drawing Bracket.dwg provided on the companion website.
2. Select the **NAVSWHEEL** command and open the **Steering Wheels Settings** dialog box.
3. Adjust the size and opacity of full-size wheels, close the dialog box, and examine the results.
4. Open the **Steering Wheels Settings** dialog box. Adjust the size and opacity of mini wheels, close the dialog box, and examine the results.
5. Change the **Walk**, **Look**, and **Orbit** tool options and test your changes.
6. Change the **Rewind** tool options and test your changes.
7. Reset the settings in the **Steering Wheels Settings** dialog box to their default values.
8. Close the drawing without saving.
