# Exercise 7-2

1. Open EX7-1B. If you have not completed that exercise, do so now.

2. Select the swept object and open the **Properties** palette.

3. Note: If you encounter any errors when changing settings, try different settings.

4. In the **Geometry** section, change the Profile rotation setting to 90°. Notice the result.

5. Change the Twist along path setting to 270°. Notice the result.

6. Change the Scale along path setting to .25. Notice the result.

7. Save this drawing as EX7-2.

To continue practicing sweeping, complete act07-02.dwg available on the companion website.
