## AutoCAD and Its Applications ADVANCED

## Exercise 8-5

1. Open the drawing EX08_05.dwg available on the companion website.
2. Use the ARRAYRECT command to array the one vertical column shown in the following illustration.

3. Create a 3D rectangular array of three rows, five columns, and two levels. Make the distance between rows and columns $10^{\prime}$, and the distance between levels $12^{\prime}-8^{\prime \prime}$. Create an associative array.
4. Edit the array using the Properties palette. Change the number of columns to 7 and the column spacing to $6^{\prime}-8^{\prime \prime}$. See the illustration below.
5. Save the drawing as EX8-5.
