# Exercise 10-11

1. Begin a new drawing.

2. Draw a 180° arc with a radius of approximately 5″.

3. Using the **Properties** palette, give the arc a thickness of 1″.

4. Convert the arc to a surface using the **CONVTOSURFACE** command.

5. Use the **THICKEN** command to thicken the new surface into a solid with a thickness of .5″.

6. Save the drawing as EX10-11.
