## **AutoCAD and Its Applications ADVANCED**

## **Exercise 13-1**

See act13-01.dwg available on the companion website.

- 1. Begin a new drawing.
- 2. Draw a solid wedge to the dimensions of your choice.
- 3. Display the wedge from a 3D viewpoint so that the angled surface points in the southeast direction.
- 4. Establish a UCS for the front profile of the wedge and one for the angled surface.
- 5. Place lines of text at two different angles on the XY plane of each UCS.
  - A. Use a thickness on one text object on each surface.
  - B. Edit the object as needed so the text extends above the surface, not inside the wedge.
- 6. Place the title 3D Wedge below the object and perpendicular to your viewpoint.
- 7. Save the drawing as EX13-1.
