

Exercise 14-11

1. Open drawing EX14-9 created in Exercise 14-9.
2. Select the section object and change it to the section boundary state. Use section object grips to adjust the section boundary to include all of the solid model.
3. Adjust the section object so the half section is on the center hole. Refer to the illustration below.

4. Save the drawing as EX14-11.
