AutoCAD and Its Applications ADVANCED

Exercise 17-1

- 1. Open the materials browser.
- 2. Hover over a material swatch in the **Library** area. Pick the **Adds material to document** button. Notice that the material is added to the **Document Materials** area.
- 3. Create a new material library named My Library. Save the new file to a location of your choice.
- 4. Right-click on the material swatch in the **Document Materials** area to display the shortcut menu.
- 5. Select **Add to>My Library**.
- 6. Pick on your new library in the materials browser. The material you added to the library should be displayed in the right-hand column.
- 7. Close the materials browser.
- 8. Save the drawing as EX17-1.
