Exercise 17-3

1. Open drawing EX17-2 created in Exercise 17-2.

2. Open the materials browser. Note that the materials attached to the objects in Exercise 17-2 have been automatically added to the **Document Materials** area.

3. Change the size of the material swatches.

4. Change the **Document Materials** area to display only the materials applied to objects in the drawing.

5. Right-click on one of the material swatches and select the objects that it is applied to. Note which objects in the drawing are now selected.

6. Right-click on one of the materials and add it to the library named My Library that you created in Exercise 17-1. Add a few more materials to this library.

7. Use the **Remove Materials** tool to remove materials from various objects in the scene.

8. Purge the unused materials from the **Document Materials** area.

9. Save the drawing as EX17-3.
