

Exercise 3-10

1. Continue from Exercise 3-9 or start AutoCAD.
2. Start a new drawing from scratch or use a template of your choice. Save the drawing as EX3-10.
3. Use the **LINE** command to draw a rectangle. Use the default **Endpoint** running object snap and object snap tracking to acquire the fourth point of the rectangle, as shown in Figure 3-19.
4. Resave and close the file.
5. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
