

Exercise 3-13

1. Continue from Exercise 3-12 or start AutoCAD.
2. Start a new drawing from scratch or use a template of your choice. Save the drawing as EX3-13.
3. Draw a rectangle using the **LINE** command and relative polar coordinates.
4. Access the **ERASE** command and erase the rectangle using the pick box.
5. Draw a rectangle using the **LINE** command and absolute coordinates.
6. Access the **ERASE** command and use the pick box to erase three of the four sides.
7. Draw a square using the **LINE** command with relative coordinates and the **Close** option.
8. Access the **ERASE** command and use an automatic window selection to erase the entire square.
9. Draw a rectangle using the **LINE** command, ortho mode, and direct distance entry.
10. Access the **ERASE** command and erase three of the four lines using automatic crossing selection.
11. Resave and close the file.
12. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
