## AutoCAD and Its Applications BASICS

## Exercise 4-11

1. Continue from Exercise $4-10$ or start AutoCAD.
2. Start a new drawing from scratch or use a decimal-unit template of your choice. Save the drawing as EX4-11.
3. Use the RECTANGLE command to draw a rectangle of any size.
4. Use the RECTANGLE command to draw a rectangle with a line width of .5.
5. Use the RECTANGLE command to draw rectangles similar to the rectangles shown in Figure 4-24.
6. Use the Dimensions option of the RECTANGLE command to draw a rectangle 6 units wide and 4 units high with a fillet radius of 0 . Make the first corner point the lower-left corner of the rectangle.
7. Create a rectangle at a $45^{\circ}$ angle using the Rotation option. Make the rectangle 10 units wide by 5 units high.
8. Resave and close the drawing.
9. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
