AutoCAD and Its Applications BASICS

Exercise 11-9

- 1. Continue from Exercise 11-8 or start AutoCAD.
- 2. Start a new drawing from scratch or use a template of your choice. Save the drawing as EX11-9.
- 3. Draw two 2.25" squares so that two sides of each square are horizontal.
- 4. Use the **SCALE** command to double the size of one square.
- 5. Use the **Reference** option to make each side of the other square 3.25" long.
- 6. Resave and close the file.
- 7. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
