Exercise 14-7

1. Continue from Exercise 14-6 or start AutoCAD.
2. Start a new drawing from scratch or use a template of your choice. Save the drawing as EX14-7.
3. Use the **SPLINE** command to draw a fit point spline similar to the original open spline shown in Figure 14-16.
4. Use the **COPY** command to create seven additional copies of the spline.
5. Apply each edit shown in Figure 14-22 to a different spline. Change the copies from fit point splines to control vertex splines as needed.
6. Resave and close the file.
7. Keep AutoCAD open for the chapter review and problems, or exit AutoCAD if necessary.
