

## Exercise 15-5

1. Continue from Exercise 15-4 or start AutoCAD.
2. Open any of your saved drawings.
3. Enter the **TIME** command and study the time information.
4. If the current date and time are incorrect, inform your instructor or supervisor.  
Set the correct date and time.
5. Update the **TIME** command display.
6. Reset the elapsed timer.
7. Close the drawing without saving.
8. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
