## **AutoCAD and Its Applications BASICS**

## **Exercise 15-6**

- 1. Continue from Exercise 15-5 or start AutoCAD.
- 2. Start a new drawing from scratch or use a template of your choice.
- Access the QuickCalc palette and evaluate the following expressions. Pay
  attention to how the result of a calculation appears in the input box. Use the
  value to form additional expressions.
  - A. 5+3
  - B. 8–5
  - C. (3\*2)\*5
  - D. 3\*2\*5
  - E. 30/2+5
- 4. Evaluate the following expressions. Clear the input box after entering each expression.
  - A. 6+2\*4
  - B. (6+2)\*4
- 5. Clear the history area.
- 6. Close the drawing without saving.
- 7. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
