# Exercise 20-12

1.  Continue from Exercise 20-11 or start AutoCAD.

2.  Start a new drawing from scratch or use a decimal-unit template of your choice. Save the drawing as EX20-12.

3.  Set up the appropriate layers, including a layer for dimensions.

4.  Create the dimensioned objects shown in the Process column in Figure 20-22 using appropriate multileader styles.

5.  Use grip editing to change the multileaders as shown in the Result column in Figure 20-22.

6.  Experiment using the **MLEADEREDIT** command to add and remove leader lines.

7.  Resave and close the file.

8.  Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
