Exercise 6-5

1. Continue from Exercise 6-4 or start AutoCAD.
2. Open a previous drawing that contains objects.
3. Save a copy of the file as EX6-5. The EX6-5 file should be active.
4. If the objects in this drawing are drawn using a light color, change their layer color to white.
5. Create a new layer called DONUT that uses a light color, such as yellow.
6. Draw two donuts on the DONUT layer with an inside diameter of 0 and an outside diameter large enough to cover several of the existing objects. Place the donuts away from each other, over several existing objects.
7. Change the draw order of one of the donuts using the **Send to Back** option. Notice the display change.
8. Experiment with the draw order of the donut using the other **DRAWORDER** options.
9. Resave and close the file.
10. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
