

## Exercise 6-8

1. Continue from Exercise 6-7 or start AutoCAD.
2. Open an existing drawing that contains objects, and confirm that model space is active.
3. Access the **Plot** dialog box.
4. Set the plot scale to **Fit to paper** and set the plot area to **Display**.
5. Pick the **Preview...** button and observe the results. A full view of the current model space display should show just as it will print on paper. Press [Esc] to end the preview.
6. Experiment by changing the drawing orientation, picking **Preview...** after each change.
7. Select the **Window** option and window a small portion of your drawing.
8. Pick the **Preview...** button to see the results. End the preview.
9. Set the plot area to **Extents**, pick the **Preview...** button, and observe the results. A full view of everything in model space should show just as it will print on paper.
10. Make a print if a printer is available for your use.
11. Keep AutoCAD open for the chapter review and problems, or exit AutoCAD if necessary.
