

## Exercise 8-2

1. Continue from Exercise 8-1 or start AutoCAD.
2. Start a new drawing from scratch or use a template of your choice. Save the drawing as EX8-2.
3. Type PO and draw a single point.
4. Pick the **Multiple Points** button from the expanded **Draw** panel on the **Home** ribbon tab and draw several points.
5. Access the **Point Style** dialog box multiple times to experiment with different point styles.
6. Access the **Point Style** dialog box multiple times to experiment with different point sizes. You may need to regenerate the display to view the relative sizes.
7. Resave and close the file.
8. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
