## **AutoCAD and Its Applications BASICS**

## **Exercise 8-2**

- 1. Continue from Exercise 8-1 or start AutoCAD.
- 2. Start a new drawing from scratch or use a template of your choice. Save the drawing as EX8-2.
- 3. Type PO and draw a single point.
- 4. Pick the **Multiple Points** button from the expanded **Draw** panel on the **Home** ribbon tab and draw several points.
- 5. Access the **Point Style** dialog box multiple times to experiment with different point styles.
- 6. Access the **Point Style** dialog box multiple times to experiment with different point sizes. You may need to regenerate the display to view the relative sizes.
- 7. Resave and close the file.
- 8. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
