Exercise 23-2

1. Continue from Exercise 23-1 or start AutoCAD.

2. Start a new drawing from scratch or use a decimal template of your choice. Save the drawing as EX23-2.

3. Set up the appropriate layers, including a layer for hatch patterns.

4. Draw objects similar to those shown in Figure 23-13 and then create a copy of the objects.

5. Use the **Pick Points** option of the **HATCH** command and the default settings to add the hatch pattern shown in Figure 23-13 to the original objects.

6. Use the **Select Boundary Objects** option of the **HATCH** command and the default settings to add the hatch pattern shown in Figure 23-13 to the copied objects.

7. Resave and close the file.

8. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
