Exercise 1-8

1. Continue from Exercise 1-7 or start AutoCAD.
2. Move the crosshairs around the drawing window and notice the XYZ values shown in the coordinate display field of the application status bar.
3. Move the cursor over the buttons located on the application status bar to display a tooltip for each.
4. Right-click on the application status bar, away from the coordinate display field or a button, and pick the **Drawing Status Bar** option. Notice that some of the commands from the application status bar move to the drawing status bar.
5. Right-click on several of the buttons in the application and drawing status bars to view the options associated with the buttons.
6. Right-click on the application status bar and uncheck the **Drawing Status Bar** option to hide the drawing status bar.
7. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
