Exercise 1-10

1. Continue from Exercise 1-9 or start AutoCAD.
2. Type the word LINE. If dynamic input is on, the word LINE will appear near the cursor. If dynamic input is not on, the word LINE will appear at the command line.
3. Press [Esc] to cancel the command.
4. With dynamic input on, type the word LINE, which should appear near the cursor.
5. Press [Enter] to start the LINE command. Notice that information and prompts display near the cursor and at the command line.
6. Press [Esc] to exit the LINE command.
7. Follow these steps to experiment with AutoComplete using dynamic input:
   A. Type a lowercase c. If the default AutoComplete settings are active, the lowercase c auto-appends to an uppercase C, and commands appear in the suggestion list.
   B. Type o to narrow the search.
   C. Hover over COMMANDLINE to display a tooltip.
   D. Pick CO (COPY) to activate the COPY command.
   E. Press [Esc] to exit the COPY command.
9. Type the letter L to experience entering a command alias. The letter L appears at the command line.
10. Press [Enter] to start the LINE command. Notice that information and prompts are presented only at the command line.
11. Press [Esc] to exit the LINE command.

(Continued on the next page)
12. Follow these steps to experiment with AutoComplete at the command line:
   A. Type a lowercase e. If the default AutoComplete settings are active, the lowercase e auto-appends to an uppercase E, and commands appear in the suggestion list.
   B. Type l to narrow the search.
   C. Hover over ELLIPSE to display a tooltip. Notice that EL (ELLIPSE) is also in the list. These are the same commands.
   D. Pick EL (ELLISPSE) to activate the ELLIPSE command.
   E. Press [Esc] to exit the ELLIPSE command.
14. Type the letters REC and press [Enter] to activate the RECTANGLE command.
15. Press [Esc] to exit the RECTANGLE command.
16. Cycle through recently used commands by pressing the up and down arrow keys. When you see LINE, press [Enter] to activate the LINE command.
17. Press [Esc] to exit the LINE command.
18. Keep AutoCAD open for the next exercise, or exit AutoCAD if necessary.
