

Exercise 3-1

1. Open the drawing Pergola_bridge.dwg provided on the companion website.
2. Display the view cube if it is not already displayed.
3. Set the Conceptual visual style current.
4. Move the cursor onto the view cube, then move the cursor around and notice how the faces, edges, and corners are highlighted.
5. Pick and hold on the cube, then move the pointer around to dynamically rotate the view. Release the pointer to display a different view.
6. Pick on any one of the corners of the cube. Notice the resulting pictorial display.
7. Right-click on the view cube and select **Parallel** in the shortcut menu. Notice how the pictorial view changes.
8. Right-click on the view cube and select **Perspective** in the shortcut menu. The previous projection is set current.
9. Close the drawing without saving.
