

Exercise 17-1

1. Start a new drawing.
 2. Draw a planar surface and place various solid primitives on top of it.
 3. Turn on sunlight and turn the default lighting off. Access the sunlight properties.
 4. Display a pictorial view, if one is not already displayed.
 5. Render the scene.
 6. Set the geographic location to your hometown, or a large city near it, and render the scene again.
 7. Change the date and time settings and render the scene again.
 8. One by one, select each image in the **Render** window and note the differences between them.
 9. Save the drawing as EX17-1.
- To continue practicing rendering with sunlight, complete act17-01.dwg available on the companion website.
