

Exercise 20-4

1. Open the drawing EX20-3 from Exercise 20-3.
2. Experiment with changing the visual style, frame rate, resolution, format, step size, and steps per second. Do not save each animation to a file.
3. Create a flyby animation of the scene using the new settings.
4. Note how the new settings affect the quality, file size, playback speed, and especially the render time.
5. Save the animation as EX20-4.wmv (or the file format of your choice).
6. Save the drawing as EX20-4.
